Fidelity Health Savings Account

A tax-advantaged way to pay for qualified medical expenses

A Health Savings Account (HSA) can be an easy and smart way to save money to pay for qualified medical expenses¹ for you and your dependents. With its triple tax advantages,² easy access to funds, and future growth potential, it's a unique savings vehicle that provides benefits today and in the future.

It's no secret that health care costs have been skyrocketing for many years and that the rapid rate of increase is affecting us all. It's estimated that a couple retiring today at age 65 will need \$295,000 to cover health care expenses in retirement.³ That means saving for health care should be an important part of retirement planning.

There is an approach that can help you better plan for and meet these rising costs—enrollment in an HSA-eligible health plan (also known as a High-Deductible Health Plan [HDHP]) and an HSA. This combination can potentially save you money on health care while giving you more control over how your medical dollars are spent.

To help you better understand HSA-eligible health plans, HSAs, and how the two work together, here are answers to some commonly asked questions to help you get started.

What is an HSA-eligible health plan?

An HSA-eligible health plan is an HDHP that satisfies certain IRS requirements with respect to deductibles and out-of-pocket expenses. You generally pay more up front for medical expenses before the plan begins to pay for covered services. In return, you will generally pay less in premiums than in other medical plans and general preventative care services are fully covered. Enrollment in an HSA-eligible health plan is one of the requirements to be eligible to establish an HSA.

What is an HSA?

An HSA is an individual account used in conjunction with an HSA-eligible health plan to cover out-of-pocket qualified medical expenses on a tax-advantaged basis. Your HSA belongs entirely to you and can be used to pay for both current and future qualified medical expenses for you and your eligible dependents. You can contribute to your account, withdraw contributions to pay for current qualified medical expenses, and potentially grow your account on a tax-free² basis by investing your savings in a wide array of investment options.

Why should I consider an HSA?

If you have the opportunity to enroll in an HSA-eligible health plan with an HSA, you may want to take a closer look. This combination may offer some significant tax and savings advantages over traditional health care plan options—no matter if you're a low, medium, or high user of health care services.

Control. You determine how much to contribute (up to your maximum annual contribution limit per IRS rules), when and how to invest your contributions, and whether to take an HSA distribution to pay for current qualified medical expenses, or let your contributions stay invested for future growth potential.

Tax savings. When used for qualified medical expenses, HSAs offer a triple tax savings—contributions, any investment earnings, and distributions are federal tax free.

Growth potential. You have the opportunity to earn a high yield on your core position, giving you more money toward your prescriptions and medical expenses. You can also invest your contributions in a variety of investment options—including stocks, bonds, and mutual funds—for potential growth of your account over time.

Flexibility. Any unused balance in your account will automatically carry over from year to year so you can begin to build your savings for future qualified medical expenses.

Portability. Your HSA always belongs to you, even if you change jobs or become unemployed, change your medical coverage, move to another state, or change your marital status.

Am I eligible to open an HSA?

You must meet several IRS eligibility requirements in order to establish and contribute to an HSA. It is your responsibility to determine if you are eligible:

- You must be enrolled in an HSA-eligible health plan on the first day of the month. For example, if your coverage is effective on May 15, you are not eligible to contribute to or take a distribution from your HSA until June 1.
- You cannot be covered by any other health plan that is not an HSA-eligible health plan.
- You cannot currently be enrolled in Medicare.
- You cannot be claimed as a dependent on another person's tax return.

If you open an HSA and do not meet the above criteria, your contributions, any investment earnings, and distributions may be subject to income taxes, penalties, and/or excise taxes.

Additionally, in order to open and contribute to a Fidelity HSA®, you must have a valid U.S. address.

How do I know if an HSA is right for me?

While many may benefit from an HSA, your personal situation will determine if an HSA-eligible health plan and HSA are the right approach to meet your health care needs. As you explore your options, consider your anticipated health care expenses, your current financial situation, and how much control you want over your medical spending.

Keep in mind that HSA's come with the additional responsibility of tracking, managing, and monitoring your health care and related expenses. The recordkeeping of your HSA is up to you, and it is important to hold on to all receipts, records, and other documentation as proof that the expenses you pay from your HSA are for qualified medical expenses.

What type of expenses does an HSA cover?

Distributions from an HSA used to pay for qualified medical expenses for you, your spouse, and dependents are tax free provided they meet the IRS definition of a qualified medical expense. The good news is that a lot of expenses qualify for payment or reimbursement, such as:

- Health plan deductibles and coinsurance
- Most medical care and services
- Dental and vision care
- Prescription drugs, over-the-counter medications, and insulin
- Medicare premiums (if age 65 or older)

Note that these expenses must not already be covered by insurance and that health insurance premiums generally do not qualify. For more information about HSAs and qualified medical expenses, refer to IRS Publications 969 and 502 at www.irs.gov or consult a tax professional.

Should an HSA be used to pay current qualified medical expenses or be saved for the future?

Using your HSA to pay for current out-of-pocket qualified medical expenses allows you to pay for these costs with pretax dollars. Saving your contributions and investing the funds for future use allows you to take advantage of tax-free growth. Why would you want to do this? The combination of HSA tax advantages and the breadth of investment options available through a Fidelity HSA provides an opportunity for potential growth. Consider this hypothetical example:

If you contributed \$3,000 annually to an HSA and earned a 7% return over a 20-year period, you could potentially grow your balance to \$127,291—that's \$60,000 from your own contributions plus \$67,291 in earnings that you can use to pay for qualified medical expenses, free from federal taxes.⁴

You can use your HSA for current out-of-pocket medical expenses and invest for the future.

Opening and contributing to your Fidelity HSA

How do I open a Fidelity HSA?

Prior to opening your HSA, you must be enrolled in an HSA-eligible health plan. When you're ready, opening and managing your HSA with Fidelity is fast and easy. You'll get information on investment choices, payment options, and ongoing support to help you build and manage your savings. For convenience, you can open a Fidelity HSA online. To begin, simply log in to NetBenefits® at [NetBenefits.com](#) or [401k.com](#). From the home page, click *Open* next to Health Savings Account. If you do not have access to NetBenefits, contact a Fidelity Representative at **800.544.3716** or your benefits toll-free number for an application.

How do I contribute to my Fidelity HSA?

If you are eligible to contribute to an HSA, there are several ways to do so, including pretax and/or after-tax contributions:

- **Pretax contributions.** You may elect to contribute to your Fidelity HSA through automatic payroll deductions on a pretax basis. You can elect your payroll contribution amount through your benefits enrollment process and may change it at any time. Contributions made through payroll deductions are exempt from FICA tax.

HSA-eligible health plans typically have lower premiums than traditional health plans. You may want to consider contributing the money you save on those lower premiums to your HSA.

Over time, that money has the potential to grow tax free² while you save to pay for future qualified medical expenses.

- **After-tax contributions.** At any time, you may make an after-tax contribution to your Fidelity HSA by check or by transferring money online between your bank and Fidelity by electronic funds transfer (EFT). After-tax contributions are tax deductible to the extent you do not exceed your allowable contribution limit.

You may also transfer assets from another HSA (provided the account type and registration are the same) or make a one-time qualified HSA funding distribution from an IRA.⁵

What are the contribution limits for HSAs?

Each year, the IRS establishes contribution limits for the upcoming year. These limits are for total contributions made to your account, including those made by you, your employer, and any other third party.

Annual IRS Contribution Limits for HSAs

	2020	2021
Individual health care coverage	\$3,550	\$3,600
Family health care coverage	\$7,100	\$7,200
Additional catch-up contribution (if age 55 or older)	\$1,000	\$1,000

Your maximum annual contribution limit depends on several factors, including when you enrolled in an HSA-eligible health plan, whether you have individual or family health care coverage, and your age.⁶ If you are age 55 or older, you can contribute up to an additional \$1,000 each year as a catch-up contribution. This also applies to your spouse if he or she is age 55 or older. Note, however, that your spouse must open an HSA for his or her own catch-up contribution.

How much should I contribute to my HSA?

You should always prepare for the unexpected by saving enough money in your core position to cover your anticipated out-of-pocket medical expenses for the year (including those of your spouse and eligible dependents).

Consider contributing at least up to your plan's deductible, and if you can afford to do so, contribute above that to save and invest for future medical needs.

What investment options are available for my Fidelity HSA?

Your Fidelity HSA is a single account that allows you to manage a portion of your savings in a high-yield core position and invest the rest for future medical expenses. You can start investing at any time by making a one-time trade or setting up automatic investing for future contributions. And there's no required minimum to begin investing.⁷

An investment trigger can help you keep enough in the core position to pay for current medical expenses, and any contribution beyond that amount will be automatically invested in your chosen investments.

You can choose to invest in a variety of investment options, including the Fidelity HSA® Funds to Consider, which is a professionally selected lineup of funds with no minimums or transaction fees, as well as more than 10,000 mutual funds, individual stocks and bonds, ETFs, and CDs available on Fidelity's brokerage platform.⁸

In addition, the HSA Investment Recommendation tool is available online, providing assistance on how to invest your HSA savings. This experience takes into account your unique HSA savings goals, risk profile, and financial situation to provide investment advice with fund suggestions from the Fidelity HSA® Funds to Consider⁸ lineup.

Using Your Fidelity HSA to Pay for Qualified Medical Expenses

How do I access my Fidelity HSA?

There are multiple ways to use your HSA for payment or reimbursement of qualified medical expenses, including, but not limited to:

- **Fidelity HSA debit card.** The Fidelity HSA debit card, issued through PNC Bank, Delaware, can be used to pay for known qualified medical expenses at the point of sale (such as pharmacy prescriptions). Many providers will also accept your Fidelity HSA debit card for payment of an invoice you received in the mail. For convenience, you can request debit cards for your spouse and eligible dependents, too.
- **Track and Pay.** Simplify how you manage your HSA-eligible health plan and Fidelity Health Savings Account (HSA) by handling your expenses, payments, claims, and receipts all in one place, on any device — smartphone, tablet, or computer. With Track and Pay, you can:
 - Track your deductible, HSA balance, and health expenses.
 - Upload receipts from your mobile device and manage them from a single location.
 - Link your insurance carrier and claims automatically appear.
 - Pay bills with a single click.
- **Fidelity BillPay® for Health Savings Accounts.** This online bill paying service enables you to quickly and easily make payments to health care providers, companies, and individuals. You can also set up an automatic payment schedule, reimburse yourself for out-of-pocket qualified medical expenses, and keep track of all payments and activity.
- **Fidelity HSA checkbook.** Your Fidelity HSA checkbook can be used to pay for qualified medical expenses at the point of sale or to make a payment for an invoice you received in the mail. You can even write yourself a check to be reimbursed for qualified medical expenses.
- **Direct debit capability.** This payment method allows a third party to withdraw money from your Fidelity HSA. You simply provide the routing and account numbers, and the vendor can set up a direct debit from your Fidelity HSA as a one-time or recurring payment option.
- **Pay out of pocket.** To take advantage of the long-term growth potential of your HSA, you may want to choose to pay for a qualified medical expense out of pocket rather than use the funds in your HSA. If you do pay out of pocket, you have the option to reimburse yourself from your HSA at any time without penalty.

Do I pay for qualified medical expenses at the time of service?

It generally makes sense for your service provider to first submit your claim to your health plan for payment. After your claim is processed, you will then receive an Explanation of Benefits from the health insurance carrier or claims payer that will show the amount, if any, that you owe the service provider. You can then make those payments through any of the payment options previously mentioned.

Can I use my HSA for nonqualified medical expenses?

Your Fidelity HSA is intended to be used for qualified medical expenses. Any distribution taken from your HSA to pay for a nonqualified medical expense must be included in your gross income for tax purposes and may be subject to an additional 20% penalty.⁹

Can I use my HSA for my dependents?

You can use your HSA to pay for qualified medical expenses incurred by your dependents, provided that they are considered dependents for federal tax purposes. Please refer to IRS Publication 501, which can be found at www.IRS.gov, for guidance regarding the definition of a dependent.

What paperwork do I need to keep in relation to my Fidelity HSA?

Since an HSA provides a tax benefit, it's important to keep organized records—including receipts and statements from your insurance company. This will help you in two ways. First, for tax purposes, it documents that you used your HSA exclusively for qualified medical expenses. And secondly, it helps to ensure that you're always paying the right amount for services.

Each year, Fidelity will provide you and the IRS a Form 5498-SA, which summarizes contributions to, and the fair market value of, your HSA. If a distribution is taken from your account, a Form 1099-SA is provided for the year in which the distribution was taken.

Combined with an HSA-eligible health plan, an HSA can help combat the high cost of health care in two ways—by providing a tax-efficient way to pay for current qualified medical expenses and an opportunity to grow your savings for future qualified medical expenses, even in retirement. Whether you're ready to get started or need more information, take your next step today.

Keep in mind that investing involves risk. The value of your investment will fluctuate over time, and you may gain or lose money.

¹Refers to qualified medical expenses as defined by the IRS.

²With respect to federal taxation only. Contributions, investment earnings, and distributions may or may not be subject to state taxation. See your tax professional for more information on the state tax implications of HSAs.

³Estimate based on a hypothetical couple retiring in 2020, 65 years old, with life expectancies that align with Society of Actuaries' RP-2014 Healthy Annuitant rates with Mortality Improvements Scale MP-2016. Actual assets needed may be more or less depending on actual health status, area of residence, and longevity. Estimate is net of taxes. The Fidelity Retiree Health Care Cost Estimate assumes individuals do not have employer-provided retiree health care coverage, but do qualify for the federal government's insurance program, Original Medicare. The calculation takes into account cost-sharing provisions (such as deductibles and coinsurance) associated with Medicare Part A and Part B (inpatient and outpatient medical insurance). It also considers Medicare Part D (prescription drug coverage) premiums and out-of-pocket costs, as well as certain services excluded by Original Medicare. The estimate does not include other health-related expenses, such as over-the-counter medications, most dental services, and long-term care.

⁴This is a hypothetical example for illustrative purposes only and does not represent the performance of any security in a Fidelity HSA. The example assumes that an individual contributes \$3,000 annually to an HSA with a hypothetical 7% annual return. An account may earn more or less. The final account balance is prior to any distributions. You may be subject to a 20% penalty if your distribution is not for qualified medical expenses. Systematic investing does not ensure a profit and does not protect against loss in a declining market.

⁵Note that the amount transferred counts toward the maximum annual contribution limit. Additionally, an individual must remain an eligible individual for the 12 months following the month the IRA distribution was made; otherwise, the amount must be included in the individual's gross income and will be subject to an additional 10% tax.

⁶The maximum annual contribution limit is based on your age and coverage tier (i.e., individual or family), as well as on when you become enrolled in an HSA-eligible health plan. Normally, for eligible individuals who enroll in the HSA-eligible plan as of the first of the plan year, the HSA contribution is prorated based on the number of months during the year a person is covered by an HSA-eligible plan as of the first day of the month. Individuals enrolled in an HSA-eligible health plan after the beginning of the plan year may contribute up to the statutory maximum annual contribution amount as long as they are eligible individuals in December of that tax year and remain eligible individuals for a full 12-month period following such month. If an individual fails to meet these criteria, the maximum annual contribution amount must be prorated based on the number of months he or she is an eligible individual, and any amount above such prorated amount is includible in the individual's gross income and subject to a 10% tax.

⁷There may be funds that require a minimum amount to invest, but Fidelity does not require a minimum to start investing.

⁸In identifying investment options to include in the Fidelity HSA Funds to Consider, Fidelity only considered Fidelity open-end mutual funds and open-end mutual funds offered by a limited universe of third-party fund companies that participate in an exclusive marketing, engagement, and analytics program with Fidelity for which they pay Fidelity an annual fee. The only third-party fund companies whose funds were eligible for this program were companies that generally have a track record of generating the strongest customer demand for their products from across Fidelity's customer channels and have been paying Fidelity a sufficient level of compensation for the shareholder servicing performed by Fidelity.

⁹This penalty does not apply if you become disabled, once you reach age 65, or after your death.

The information provided in this brochure is general in nature. It is not intended, nor should it be construed, as legal or tax advice. Because the administration of an HSA is a taxpayer responsibility, you are strongly encouraged to consult your tax advisor before opening an HSA. You are also encouraged to review information available from the Internal Revenue Service (IRS) for taxpayers, which can be found on the IRS website at www.IRS.gov. You can find IRS Publication 969, *Health Savings Accounts and Other Tax-Favored Health Plans*, and IRS Publication 502, *Medical and Dental Expenses (including the Health Coverage Tax Credit)*, online, or you can call the IRS to request a copy of each at 800.829.3676.
